On 11 August, 30 new trucks, which had been seen leaving the heath west of Colbitz near Tolmirstedt were loaded at the Colmirstedt railroad station. The train left Tolmirstedt toward Stendal. The train left Tolmirstedt toward thank traffic was heavior this year than it had been during 1951. The residents of Colbitz were not allowed to leave their houses after 10 p.m. and their houses had to be blocked-out after dusk. (3)

25X1

SECRET

.Ko tank and some with artillery insimia or with black-bordered crimson epaulets. On 15 August, T-34/85 tanks 25X1 were loaded at the Jaevenitz railroad station. Jaevenitz residents stated that about 20 rocket launchers 25X1 had moved to the troop training grounds on 14 and 15 August, via the Jaevenitz-Letzlingen road, Motor vehicles seen in traffic from, and to, the came in the Woods 25X1 Comments, 25X1 to have seen only part of Camp Planken south of muetten as he reported quarters for only about 2,350 men. As a division has been stationed in the camp during about five months, in the summer of 1952, more low temporary buildings must exist. It is rather improbable that the majority of the division should be quartered in tents. According to previous reports, the 7th Gds Tank Div is carried in Camp Planken. However, the motor vehicles seen in traffic to the camp the Third Shock Army. 25X1 As, however, the road from Haldensleben to Camp Born runs east of Camp Planken and as the 19th dis Mecz Div is stationed in Camp Born besides other units, it is possible 25X1 observations regarding road and camp traffic are subject to error, (2) The 30 trucks were probably loaded by soldiers of the 7th Gds Tank Div. (3) Most of the motor vehicle 25X1 in the Colbitz area confirm units of the 10th Gds Tank Div in Camp Dollo until 11 August. 25X1 Camp Jaevenitz southeast of Jaevenitz, was still occupied by elements of the 207th Mtz Rifle Div until 22 August 1952.
